

# ABOUT ME

Hello, I am Hasan Can Şahin, I was born in Istanbul in 2006. I am an IT graduate who graduated from Nahit Menteşe Vocational High School in the field of Information Technologies. I have been improving myself in software for almost 4 years by working both in school and in my other times. I completed my high school internship at Istanbul Aydın University's Software Office. I took a full-stack role in CRM-style projects. I think I can take a big role in every project within the web.
